2.3 Other hazards	Not app	licable.
3 Composition/Information	ı on ingred	ients
3.1 Substances		
Identification number(s)		
EC number:	265-150	
Index number:	649-327	-00-6
3.2 Mixtures		
Description:	Mixture	of the substances listed below with nonhazardous additions.
Dangerous components:		
64742-48-9 aliphatic hydrocar	bons, C10-C1	I3         Asp. Tox. 1, H304; Flam. Liq. 4, H227         50-100%
Additional information:		C (21st ATP). The benzene content of the product is less than 0.1%
	Classific	catin or labeling as carcinogenic is not necessary. (Contd. on page 3

First aid measures	
4.1 Description of first aid measu	RAG
General information:	Immediately remove any clothing soiled by the product.
General information.	Take affected persons out into the fresh air.
After inhalation:	Supply fresh air. If required, provide artificial respiration. Keep patient warm. Cons
Ajter innumion.	doctor if symptoms persist.
	In case of unconsciousness place patient stably in side position for transportation.
After skin contact:	Immediately wash with water and soap and rinse thoroughly.
Ajter skin contact.	If skin irritation continues, consult a doctor.
After eye contact:	Rinse opened eye for several minutes under running water. Then consult a doctor.
After swallowing:	If swallowed, seek medical advice immediately and show this container or label.
4.2 Most important symptoms and	•
effects, both acute and delayed	Unconsciousness
ejjeens, boin acare ana acayea	Nausea
	Dizziness
	Headache
	Dizziness
Danger	Danger of pneumonia.
4.3 Indication of any immediate	Danger of preumonia.
<i>medical attention and special</i>	
treatment needed	No further relevant information available.
Firefighting measures	
5.1 Extinguishing media	
Suitable extinguishing agents:	Sand
	Fire-extinguishing powder
	Water haze
	Carbon dioxide
	Curbon dioxide
For safety reasons unsuitable	CO2, extinguishing powder or water spray. Fight larger fires with water spray
For safety reasons unsuitable extinguishing agents:	CO2, extinguishing powder or water spray. Fight larger fires with water spray
	CO2, extinguishing powder or water spray. Fight larger fires with water spray alcohol resistant foam.
extinguishing agents: 5.2 Special hazards arising from	CO2, extinguishing powder or water spray. Fight larger fires with water spray alcohol resistant foam.
extinguishing agents:	CO2, extinguishing powder or water spray. Fight larger fires with water spray alcohol resistant foam. Water with full jet
extinguishing agents: 5.2 Special hazards arising from the substance or mixture	CO2, extinguishing powder or water spray. Fight larger fires with water spray alcohol resistant foam. Water with full jet
extinguishing agents: 5.2 Special hazards arising from the substance or mixture 5.3 Advice for firefighters	CO2, extinguishing powder or water spray. Fight larger fires with water spray alcohol resistant foam. Water with full jet Formation of toxic gases is possible during heating or in case of fire.

### Trade name: 8000 Osmo Brush Cleaner and Thinner

6.1 Personal precautions,	
protective equipment and	
emergency procedures	Keep away from ignition sources
	Ensure adequate ventilation
6.2 Environmental precautions:	Do not allow to penetrate the ground/soil.
	Do not allow to enter sewers/ surface or ground water.
6.3 Methods and material for	
containment and cleaning up:	Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders
	Dispose contaminated material as waste according to item 13.
	Ensure adequate ventilation.
6.4 Reference to other sections	See Section 7 for information on safe handling.
-	See Section 8 for information on personal protection equipment.
	See Section 13 for disposal information.

#### 7 Handling and storage

7.1 Precautions for safe handling	Use only in well ventilated areas.
	Store in cool, dry place in tightly closed receptacles.
	Keep away from heat and direct sunlight.
	Ensure good ventilation/exhaustion at the workplace.
	Prevent formation of aerosols.
Information about protection	
against explosions and fires:	Fumes can combine with air to form an explosive mixture.
	Highly volatile, flammable constituents are released during processing.
7.2 Conditions for safe storage, in	cluding any incompatibilities
Storage:	
Requirements to be met by	
storerooms and receptacles:	Store only in the original receptacle.
-	Store in a cool location.
Information about storage in one	

common storage facility:Store away from foodstuffs.<br/>Do not store together with alkalis (caustic solutions).<br/>Do not store together with oxidizing and acidic materials.Further information about<br/>storage conditions:Protect from heat and direct sunlight.<br/>Store in a cool place. Heat will increase pressure and may lead to the receptacle<br/>bursting.<br/>Store receptacle in a well ventilated area.<br/>Keep receptacle tightly sealed.

7.3 Specific end use(s)	(Contd. of pag No further relevant information available.		
Exposure controls/ Personal protection			
Additional information about design of technical systems:	No further data; see item 7.		
8.1 Control parameters Components with limit values the require monitoring at the workplace:	at The product does not contain any relevant quantities of materials with critical values		
Additional information:	that have to be monitored at the workplace. The lists that were valid during the creation were used as basis.		
8.2 Exposure controls Personal protective equipment: General protective and hygienic measures:	Do not eat, drink, smoke or sniff while working. Avoid close or long term contact with the skin. Keep away from foodstuffs, beverages and feed. Wash hands before breaks and at the end of work. Do not inhale gases / fumes / aerosols. Immediately remove all soiled and contaminated clothing. Avoid contact with the eyes and skin.		
Breathing equipment:	Do not carry product impregnated cleaning cloths in trouser pockets. Not necessary if room is well-ventilated. Use suitable respiratory protective device only when aerosol or mist is formed. Short term filter device:		
Protection of hands:	<ul> <li>Gas filter EN 14387 Type A (organic gas / vapor (boiling point &gt; 65 °C)).</li> <li>Solvent resistant gloves</li> <li>The glove material has to be impermeable and resistant to the product/ the substant the preparation.</li> <li>Selection of the glove material on consideration of the penetration times, rates diffusion and the degradation</li> <li>Preventive skin protection by use of skin-protecting agents is recommended.</li> </ul>		
Material of gloves	Nitrile rubber, NBR		
	<i>al</i> The exact break trough time has to be found out by the manufacturer of the protecting gloves and has to be observed.		
For the permanent contact glove made of the following materials	25		
are suitable:	Nitrile rubber, NBR Recommended thickness of the material: ≥ 0.4 mm For the mixture of chemicals mentioned below the penetration time has to be at lea 480 minutes (Permeation according to EN 374 Part 3: Level 6). (Contd. on page
